

Project 1: Save Planet

The system that will be developed under this theme allows users to monitor and analyse real-time data to optimize usage and enhance efficiency.

Sr. No.	Sensor
1	Current sensor
2	Voltage Sensor
3	Relay
4	Potential Transformer
5	5V AC supply
6	LCD
7	Raspberry Pi
8	Power Supply
9	Jumper Wires

Project 2: Green Environment

The system that will be developed under this theme will collect and share real-time data, providing users with valuable insights.

S#	Sensor
1	Temperature/Humidity Sensor- DHT11
2	Pressure Sensor
3	LCD
4	Raspberry Pi
5	Power Supply
6	Jumper Wires
